PROFESSIONAL SUMMARY

SOC-focused IT professional with ~3 years' experience securing and troubleshooting Windows and Linux systems. Advanced Repair Agent skilled in endpoint security, malware remediation, incident response fundamentals, and network troubleshooting. AS in Cyber Defense; CompTIA A+ Core 1 passed (Core 2 in progress). Pursuing BS in Cybersecurity (CSUSB, Spring 2027). Seeking SOC Analyst I / Junior Cybersecurity roles.

EXPERIENCE

2013 - PRESENT | ADVANCED REPAIR AGENT | GEEK SQUAD / BEST BUY

- Investigate and remediate endpoint security incidents including malware infections, OS compromise, and system instability
- Perform malware removal, OS reinstallation, patching, and secure system recovery
- Troubleshoot network connectivity issues involving TCP/IP, DNS, DHCP, routers, and switches
- Apply incident response fundamentals by identifying incidents, containing impact, restoring services, and documenting actions taken
- Conduct root-cause analysis to reduce recurring issues and improve system reliability
- Maintain technical documentation using internal ticketing and knowledge systems
- Support and mentor junior technicians on structured troubleshooting workflows

TECHNICAL SKILLS

NETWORKING & INFRASTRUCTURE

- TCP/IP, OSI model
- DNS, DHCP, NAT
- VLAN segmentation
- Routing & switching fundamentals
- Network troubleshooting & traffic analysis

SECURITY OPERATIONS & SOC

- SOC fundamentals
- Incident response lifecycle
- Malware remediation & OS recovery
- Vulnerability assessment fundamentals
- Access control & least privilege
- Security monitoring & escalation workflows

OPERATING SYSTEMS & ADMINISTRATION

- Windows 10/11 administration & recovery
- Windows Event Viewer
- Linux administration (Ubuntu, Kali)

EDUCATION

Associate of Science — Cyber Defense
Riverside City College
2022-24

Bachelor of Science — Cybersecurity
California State University, San Bernardino (CSUSB)
Expected Graduation: Spring 2027

RELEVANT COURSEWORK & TRAINING

- CCNAv7: Switching, Routing, and Wireless Essentials (Cisco Networking Academy)
- NDG Linux I
- Ethical Hacking Fundamentals
- Computer Forensics Fundamentals
- Information and Network Security

CERTIFICATIONS

- CompTIA A+ — Core 1 Passed | Core 2 In Progress
- CompTIA Network+ — Planned
- CompTIA Security+ — Planned

PROJECTS & HANDS-ON EXPERIENCE

Homelab & Security Labs

- Built and maintained multi-VM lab environments using Windows and Linux
- Designed and tested networks in Cisco Packet Tracer including routing, switching, and VLANs
- Conducted controlled vulnerability assessments using Kali Linux, DVWA, and Hack The Box

Raspberry Pi NAS

- Deployed a Raspberry Pi-based NAS providing network-accessible storage
- Configured Linux services, user permissions, access controls, and backups

Firmware & Embedded Systems

- Developed and deployed custom firmware on Nintendo Switch hardware
- Booted and configured Linux and Android operating systems
- Performed firmware-level troubleshooting and system recovery
