

Technical Experience

Social Media & Cinema Platform | Website | Source Code

React | Express | PostgreSQL | Cheerio | Heroku | Supabase

- Aggregated **real-time showtimes** for Egyptian cinemas by building a web scraper with **Cheerio**.
- Added social media features like post creation, rating currently showing movies, and user profile customization.
- Designed the relational database (**ERDs**) and implemented it via **Prisma** ORM.
- Reduced latency and improved responsiveness using **Optimistic UI updates** and React **memoization**.

Real-Time Chat Application | Website | Source Code

React | Zustand | Socket.io | Express | Prisma | Cloudinary

- Developed a real-time chat application with **live seen indicators**, **push notifications**, **friend systems**, and **group chat rooms**.
- Applied correct database **indexing** and relations to ensure fast retrieval of chat messages, user chats, and chat room users.
- Used **Socket.io** rooms to ensure that even if a user opened their account from two locations, they receive the same content.
- Used **Zustand** state management to simplify the frontend code as much as possible.

Personal Blog & Admin Dashboard | Website | Source Code

React | Express | TinyMCE | Prism | Neon

- Allowed content management by building a secure **Admin Dashboard** for full CRUD operations.
- Implemented **rich text editing** and **session recovery** backups by configuring the **TinyMCE** editor.
- Implemented Tailwind typography to ensure a **semantic** article layout.
- Implemented syntax highlighting for code blocks with **Prism.js**.

AI Engineering Tool | Source Code

OpenAI | FastAPI | Pydantic

- Developed a **Smart Zoom tool** to identify the image's main subject and perform a smart zoom on hover.
- Ensured **structured AI responses** by using **Pydantic models**.
- Increased model reliability and accuracy by applying modern **prompt engineering** techniques.

Achievements & Certifications

Competitive Programming

2023 – 2025

ECPC Finalist & Competitor

Egypt

- Qualified for the **ECPC Finals** and solved 6/13 complex algorithmic problems during the qualifications.
- Solved **1,500+ problems** on Codeforces, LeetCode, and other competitive programming platforms.

The Odin Project

Aug 2025 – Feb 2026

Full Stack Web Developer Curriculum

Remote

- Demonstrated full-stack proficiency by building **25+ projects** ranging from static sites to production apps.

Certifications

- Machine Learning Specialization (Coursera)
- MongoDB Associate Developer (MongoDB)

Leadership

ECPC Club Instructor

2023 – 2025

- Mentored university students in the fundamentals of **Competitive Programming** and algorithmic problem-solving.

Technical Skills

Languages: JavaScript, TypeScript, SQL, Python, C++
Backend: Node.js, Express, PostgreSQL, Prisma, Supabase, JWT, Socket.io, FastAPI, Jest
Frontend: React.js, Tailwind CSS, HTML5, CSS3, Shadcn/ui, MUI, Sass, Vitest
