## PROFILE

Electronics & Communication Engineering undergraduate with hands-on experience in embedded systems, industrial automation, and hardware–software integration. Passionate about building reliable electronic systems and data-driven solutions. Seeking internships in Embedded Systems, IoT, Core Electronics, or VLSI.

## KEY SKILLS

|                        |                                                 |
|------------------------|-------------------------------------------------|
| Embedded & Programming | C, Python, Embedded Debugging, Microcontrollers |
| Core Electronics       | Analog, Digital, Communication Systems          |
| Industrial IoT         | Sensors, DAQ, Real-time Monitoring              |
| Tools                  | Xilinx Vivado, Circuit Design & Verification    |
| Domains                | Embedded, Automation, IoT, VLSI Fundamentals    |

## EXPERIENCE

Industrial IoT & Automation Intern — Technoviz Automation

- Worked with industrial sensors, PLCs, and automation hardware.
- Assisted in embedded data acquisition and real-time monitoring systems.
- Observed fault diagnosis, system integration, and debugging workflows.
- Collaborated with engineers on live industrial automation projects.

## PROJECTS

### AI-Based Smart Energy Management System

- Developed an IoT and AI based system to monitor and optimize electricity consumption in buildings.
- Integrated ESP32 with voltage and current sensors to collect real-time power usage data.
- Built a dashboard to visualize live energy consumption and system status.
- Implemented AI prediction model to forecast future energy demand and detect abnormal usage patterns.
- Designed for smart buildings and smart city energy optimization.

## ACADEMIC PROJECTS

- Superheterodyne Receiver: RF front-end, IF stages, and detection study.
- Analog Circuits: Designed and simulated clippers and clampers.
- Digital Systems: Registers, counters, flip-flops, memory concepts.
- Semiconductors: PN junctions, diodes, and transistor behavior.

## EDUCATION

B.Tech — Electronics & Communication Engineering (2024–2028)

Panipat Institute of Engineering and Technology

Senior Secondary (Class XII) — 2024

Rishikul Vidhyapeeth, Delhi

## LANGUAGES

English (Fluent) • Hindi (Native)
